

Memory Screening

A Closer look at Memory Changes

A **Memory Screen** is a wellness tool that helps identify possible changes in memory and cognition. It creates a baseline of where a person is at so that future changes can be monitored.

It's **Free** and only takes
15 minutes!

Early detection is important
Treatment is possible. Stay in control of your life.

Get immediate results!

Keep them for future comparison, share them with your family and physician. At your request, we will fax them to your physician.

Early detection is important!

Just as blood pressure, cancer, diabetes, or stroke screening contribute to prevention and better treatments, so do **Memory Screens**.

Treatment is possible!

Some types of dementia are reversible, like those caused by nutritional and vitamin deficiencies, depression, thyroid issues, and more.

Knowledge means you have more control!

Dementias that are not reversible can often be treated with medications that can help manage symptoms and preserve quality of life for a longer period of time.

Memory Screenings will be held at

Grafton Senior Center

Thursday, July 14, 2022

8:30am-12pm & 1pm-3pm

By Appointment only
